-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 9, and 10 of U.S. Patent No. 6745393. Although the conflicting claims are not identical, they are not patentably distinct from each other for the following reasons.

Claim 1 adds, “wherein, for the at least one tuning request stored in the tuning request storage section, the result of the corresponding tuning process is notified to the application which issued the at least one tuning request.” However, this is obvious since it is disclosed that under the DVB-MHP standard, for any tuning request issued from an application, the result of a corresponding tuning process be notified back to the application.

Claim 2 states “The broadcast receiving apparatus according to claim 1, wherein the tuning request storage section stores information indicating which application has issued the at least one tuning request.” This is obvious, since if the application is to be notified, the tuning request storage section must know which application issued the request.

Claim 3 is the same as claim 2 from US 6,745,393.

Claim 4 is similar to claim 9 from US 6,745,393 in the same way that claim 1 is similar to claim 1 from US 6,745,393.

Claim 5 is rejected on the same grounds as claim 2.

Claim 6 is rejected as being an obvious variant of claim 10 from US 6,745,393.
